AMENDMENT

Dear Sir:

Please amend the above-identified application as follows:

IN THE CLAIMS

Claim 1 presently amended

A nebulizer connector tube for interconnection between a patient face mask provided with a tube fitting having a standard diametric dimension including a circular connection flange at the outer and thereof, and a nebulizer device provided with a tube fitting of a different circular diametric dimension, comprising,

an elongated tube having a face mask connector collar and nebulizer connector collar at the opposed end thereof,

said elongated tube formed from an inert, non-toxic plastic material and provided with a bellows type configuration along the length thereof between the face mask connector collar and the nebulizer connector collar,

said bellows type tube being flexible and resilient, and having at least a partial memory thereby to retain any desired flex position.
